Nonstop top. Xlife top sheet

Lasts long. Forms great.
Comes back recycled.

The Xlife top sheet is a further development of the proven Xlife panel and sets new standards in technology. It consists largely of recycled plastic, is 100% recyclable and is used in many Doka framed formwork systems. The Xlife top sheet offers outstanding durability and a visually appealing concrete surface. This is non-stop top!

Sustainability

- Sheet core with 100% recycled plastic
- Sheet 100% recyclable: used sheets can be taken back and fully reintroduced into the cycle (closed loop)
- Significant reduction of product carbon footprint in comparison to conventional wood-composite sheets due to long lifespan

Economic efficiency

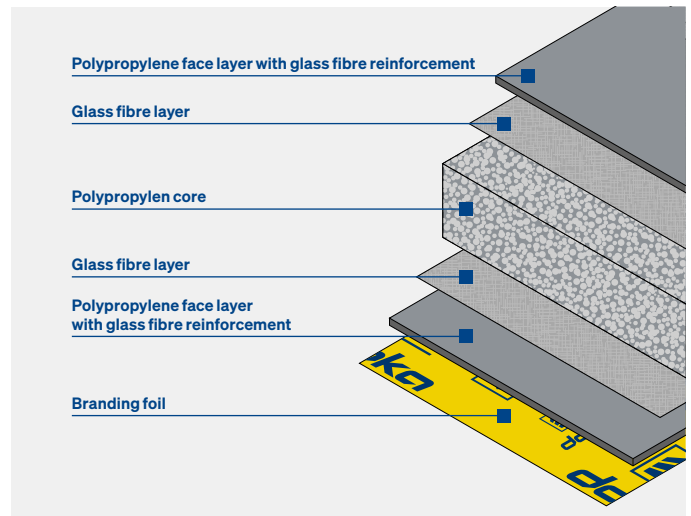

- High durability due to innovative plastic composite technology
- Low reconditioning costs due to robust sheet structure and diverse reconditioning methods
- Fast and easy cleaning even when using high-pressure washers
- Less rework is needed due to consistently good concrete appearance, even after multiple reuses

Appealing concrete surface

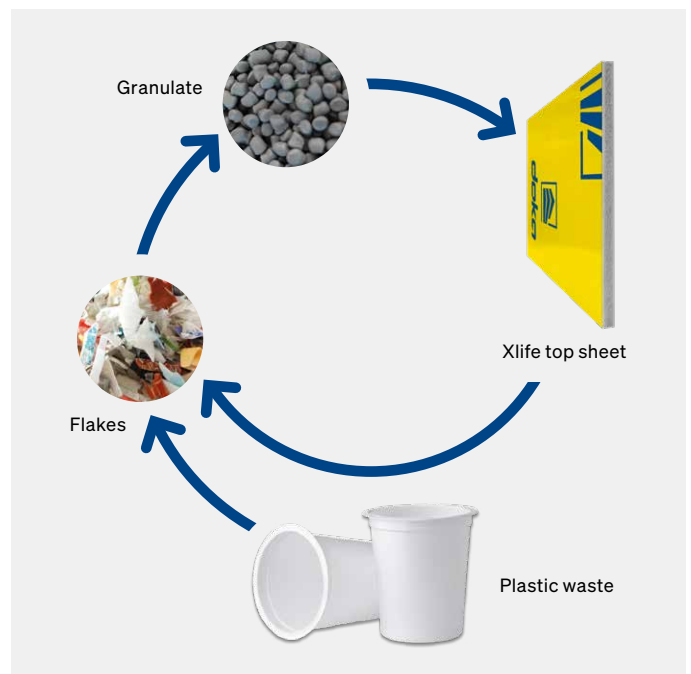

- Uniform concrete finish is achieved thanks to the new silk-matte surface structure of the sheet
- The Xlife top surface offers high scratch resistance
- Flush installation of the sheet in the panel ensures flatness
- No concrete staining, as can occur with phenolic resin sheets
