

The background of the advertisement is a surreal scene. In the foreground, a child is riding a bicycle on a dark asphalt surface. To the left, a yellow DokaXdek robotic platform is visible. In the center, several large, yellow, rectangular metal frames are floating in the air, arranged in a way that suggests they are being assembled or disassembled. The background shows a city skyline under a clear blue sky.

# **DokaXdek.** The new dimension in slab construction.

length × width × **versatility**

## DokaXdek. The new dimension in slab construction.

### DokaXdek. length x width x versatility

A slab formwork system for application and combination in many different ways. DokaXdek is suited for all construction sites ranging from small residential projects to large construction sites. For any type of floor geometry DokaXdek ensures more safety, ergonomics and economy. The DokaXdek system consists of DokaXdek table, DokaXdek panel floor formwork and DokaXdek I-frame. Moreover, the DokaXbot enables a big step towards automation.

### Versatile

- Suitable for small residential buildings and large-scale projects
- Combination of big table units with DokaXdek handset system (DokaXdek panel floor formwork and DokaXdek I-frame)
- Universal for all height levels and slabs with high thickness for all building geometries (from the thin balcony slab to massive downstand beams)

### Ergonomic

- Working with lightweight parts from the ground
- Reduce the workload of site personnel and increase productivity thanks to DoKart plus\* and DokaXbot\* (\*Demo version)

### Economical

- Fast construction progress thanks to suitable system solution for every site situation
- Fast work processes (slab tables up to 12.5 m<sup>2</sup> in size)
- Durable and high-quality components, e.g. Xlife panel

### Safe

- DokaXdek handset systems: Safety during assembly and wind thanks to smart up-lift protection - can be deactivated if required
- High stability and flexible positioning of the swivel head ensure safe working with the DokaXdek table
- Safe system connection between table and handset system

The DokaXdek panel floor formwork is a lightweight and flexible two-person element system.

DokaXdek table in use at ARGE Garnmarkt, Götzis – Austria

Ergonomic working with DokaXbot\* and DokaXdek-I-frame\* (demo versions).

Foreman, Josef Lehner GmbH

What the expert  
has to say ...

„The DokaXdek panel floor formwork and DokaXdek I-frame are lightweight in the handling for the worker. The DokaXdek table can be combined flexibly with the DokaXdek handset system.“
