Column formwork **Top 50**

The formwork for cast-in-place columns
of any shape and size

www.doka.com.au

The formwork for cast-in-place columns of any shape and size

Complicated column cross-sections, large column heights, many formwork re-use cycles, tough specifications regarding the concrete finish – a made-to-measure Column formwork Top 50 can handle them all economically.

Any column dimension is possible

thanks to modular 'construction kit' system

- can be adapted to different requirements and fresh-concrete pressures, as the system is freely configurable to any project
- superlative concrete finishes, as any form-facing is possible
- non-tied column cross-sections of up to 120 cm x 120 cm are possible by using the Corner connecting plate 90/50
- round and polygonal columns of up to 4.00 m in diameter are possible by using the Column connecting plate 6/8

Column formwork Top 50 can be face with any desired form-facing. The Ready-to-Use Service will deliver even the most unusual shapes to the site, on time and ready for immediate use.

Highly economical

thanks to the single source for advice, planning and pre-assembly

- cuts equipment costs, as rentable standard components can be used for any cross-section of column
- the formwork is quick to put up on the site, as the pre-assembled elements fit together exactly

Comprehensive workplace safety

with compatible ladderways and working platforms

- safe vertical access with the Ladder system XS
- workplace safety on all sides with column-formwork platforms
- practical accessories – such as panel struts, lifting/repositioning devices etc. – make for safe, easy handling of the formwork

Used in conjunction with the Doka column formwork platform 150/90cm, the Ladder system XS ensures high worksite safety.
