We make it work.

Xclimb 60 climbing formwork – Folding platform

One step less, one step ahead

Quickly ready for use thanks to pre-assembled platform unit.

With the new upgrade of the Xclimb 60 climbing formwork, you save valuable time on installation and get started on the regular operation sequence faster. The pre-assembled platform units are delivered to the construction site by truck just in time. The platform unfolds when lifted by crane and assembly on the structure can start. The benefit for you: faster assembly, less space required and less strain on your personnel.

Economical

- **Saves space and personnel:** Thanks to pre-assembled folding platforms consisting of working platform, vertical profile and foldable diagonal brace.
- **Immediately ready to go:** Folding platforms can be lifted from the truck and fixed to the building faster with fewer crane lifts.
- **Efficient working:** Thanks to standardised routines, our pre-assembly service and rental park guarantee simple and smooth processing and an uncomplicated return process.

Dimensions

Quickly stacked and transported: Platforms up to 8.0 m long are delivered in three-high stacks directly to the construction site.

Safe

- **No working under suspended loads:** The innovative folding mechanism with integrated self-locking ensures a high level of safety.
- **Safe platform transition:** The system offers solutions for corners and straight transitions.

Precise

- **Professional solution thanks to the Doka pre-assembly service:** High quality of workmanship ensures reliable results, regardless of the weather.
- **Perfect extension:** Seamless integration into the Xclimb 60 modular system. Crane-lifted and self-climbing solutions are possible.

Safety brace

Immediately ready to go: Thanks to the foldable diagonal brace with integrated locking mechanism, the platform can be quickly and safely unfolded and hooked to the building.
