The pre-assembled scaffold platform for concrete construction sites

The Doka Folding Platform K are preassembled platforms delivered to the site folded flat to save space. Onsite, a few simple steps are all it takes to open the platform and to install them into position.

Tested safety

for reliable protection

Put the advantages of these Working Scaffolds to work for you

- reduced costs, due to faster, safer working
- extra-high load-bearing capacity (max. 75 psf)
- the crane-hoisting points can be lowered out of the way to leave a flat, wide platform deck
- the right safety solution for every situation

Rapid working

thanks to easy handling

Reduced labor and crane times, thanks to

- pre-assembled units
- planning where to put the suspension points is easy, thanks to the system's logical concept
- ready for use straight away, after a very few quick and easy actions

Versatility

can be used for all types of safety task

Depending on your needs, you can use the pre-assembled scaffold platforms as

- working platforms
- protection platforms
- fall barriers
- protective canopies

Highly cost-efficient

saving you time and money

Achieves cost-optimization by

- being easy to use
- having a long lifespan
- Less storage and transport space

Logistics: The Folding platforms K are pre-assembled and can be transported and stored folded closed. This saves space and keeps them safe from overturning and slipping. This high packing density translates into low shipping volume and excellent utilization of the loading area of the truck.

Rentable extension components permit cost-saving, efficient utilization.
