Framed formwork Framax Xlife plus 3.00 m – form walls even more cost-effectively

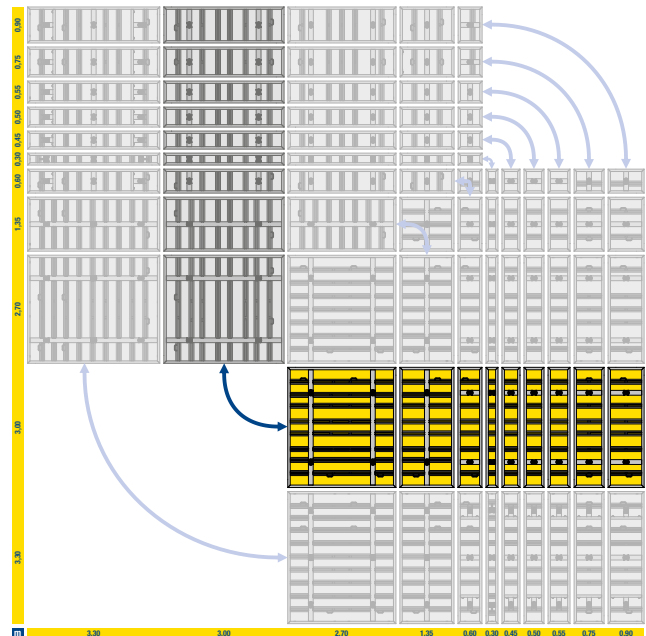

The Framax Xlife plus wall formwork system is now extended with the introduction of a new 3.00 m high panel option. Economical forming is enabled with only two tying levels for a 3.00 m formwork height. The integrated function profiles provide additional flexibility in applications and for mounted parts such as brackets, panel struts and walings.

Advantages at a glance

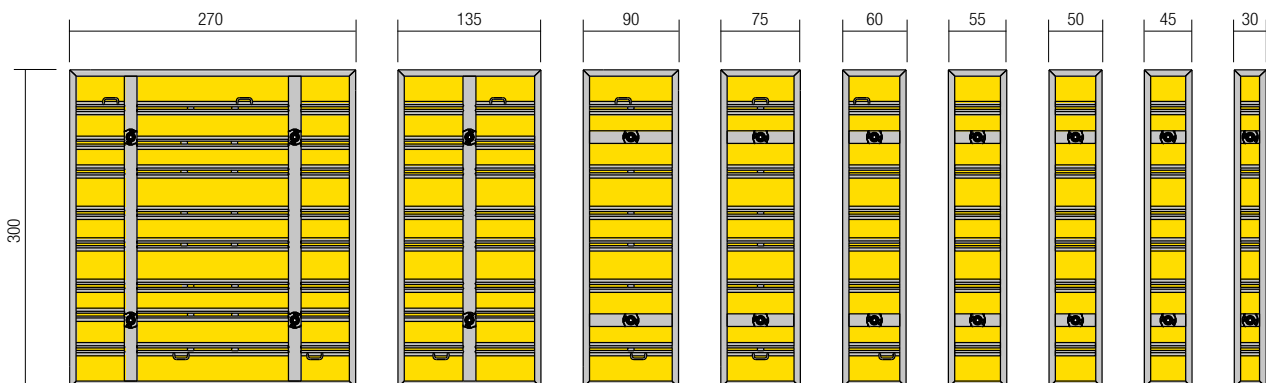

- Cost-effective, fast forming with only two tying levels for 3.00 m formwork height
- No time-consuming vertical stacking for wall heights up to 3.00 m
- Permissible fresh-concrete pressure 75 kN/m^2 , so no constraint on pouring rate up to 3.00 m high
- Function profiles in all levels for additional flexibility when connecting accessories
- Hot-dip galvanised frames and robust Xlife sheets ensure a long lifespan
- Powder-coated surface for fast, easy cleaning
- Great flexibility, because all panels can be set upright or on their side

Framax Xlife plus 2.70 x 3.00 m: only four form ties for 8.1 m^2 of formwork

Panel height 3.00 m: upright or turned on its side, combinable with all system heights
