## Floor prop Eurex 20 LW

Light, durable and ergonomic – due to the use of high-strength steels, the floor prop weighs 20% less than conventional props made of unalloyed structural steel. All this with the usual performance and durability.

**20%**  
weight saving

- **Exceptionally high ergonomics**  
because of 20% weight saving compared to conventional EN 1065 class B/D props
- **Long-term durability**  
through innovative material technology and high manufacturing quality
- **Greatest possible safety**  
due to end-to-end quality assurance and certified load-bearing capacity
- **High application safety**  
with handtrap-prevention and anti-drop-out latch
- **Optimally energy-saving, low-wear release of the adjusting nut**  
because of special thread geometry
- **Quick and easy height adjustment**  
with permanent numbering of the pegging holes

- A** Hole numbering
- B** Ergonomic fastening clamp
- C** Forged adjusting nut
- D** Hot-dip galvanised, both inside and out
