

FOR IMMEDIATE RELEASE

October 2025

Doka USA Brings Real-World Innovation to the Jobsite at CONEXPO 2026

Visit Booth #8411 in the Platinum Lot to see what happens when digital tools, smarter formwork, and field expertise come together to make construction work faster, safer, and more sustainable.

Kenilworth, NJ – October 2025 – Doka USA, a world leader in formwork and shoring solutions, will make a major appearance at CONEXPO-CON/AGG 2026 in Las Vegas, where innovation meets real-world performance. Located in the Platinum Lot, Booth #8411, Doka's 60 ft x 80 ft, three-level outdoor exhibit will invite visitors to experience firsthand how the company is shaping the future of concrete construction — through advanced form and shoring technology, sustainability, and digitalization.

The exhibit will feature live demonstrations, interactive digital stations, and full-scale systems, showcasing how Doka's solutions perform under real jobsite conditions.

"ConExpo gives us the opportunity to connect directly with the contractors and engineers who make projects happen," says Michael Kennedy, Executive Vice President America & CEO Doka USA.

"We're not just showing products we're showing what's possible when you combine proven systems with digital intelligence and a customer-focused mindset."

When Digital Finally Clicks – Doka 360

Doka 360 represents the next leap forward in jobsite transparency and control. This connected platform integrates Doka's digital tools including Concremote, DokaXact, and future smart services all into one ecosystem designed to optimize planning, execution, and monitoring. Visitors can explore how Doka 360 enables real-time insights and seamless coordination between field, office, and equipment moving construction toward faster, safer, and more cost-efficient outcomes.

We Got Your Deck – SuperDek Slab Formwork

SuperDek redefines slab forming with faster cycles, fewer components, and a simple, safe setup. Designed around an 8x8 grid, SuperDek allows crews to pour more square footage per day while reducing labor and setup time. Its patented drop-head design ensures quick stripping and early re-use, increasing efficiency across all slab operations.

From handset slab formwork to truss table forms for high-speed construction, Doka will showcase its full range of slab systems all engineered for performance, speed, and safety.

Closing the Loop – Xlife top Formwork Sheet

Sustainability meets strength with Xlife top, Doka's first formwork sheet featuring a core made entirely from upcycled plastic. Engineered for multiple reuse cycles, Xlife top reduces material waste and maintenance costs while delivering a consistent concrete finish. At the end of its life, each sheet is returned to Doka's closed-loop system to be reprocessed into new sheet cores proving that sustainability and economic performance can go hand in hand.

Automation in Action – Shear Wall Climber with FormDrive

Building upward has never been more efficient. Doka's Shear Wall Climber with FormDrive introduces semi-automated motion to high-rise formwork. With an integrated mobile control unit, operators can lift and position formwork systems safely and precisely from a single interface reducing manual workload and increasing productivity. The system exemplifies Doka's continued commitment to jobsite safety, innovation, and practical automation.

More to Discover at Booth #8411

Beyond these headline solutions, Doka USA will present a broad range of formwork, shoring, and safety systems that support every phase of construction including:

- Formwork Plywood
- Props and shoring systems for diverse applications
- Comprehensive safety solutions such as catch fans & protection screens
- Hydraulic stripping corner
- SuperCurve circular steel wall formwork system for curved structures
- Scaffolding and stair tower systems
- Wall formwork favorites: Steel Girder, Large-area Top 50, Frami handset formwork, in addition to Framax now featuring the new Xlife top sheet

Innovation driven by Experience

Behind every Doka innovation is a team committed to customer success. From pre-assembly and reconditioning services to fully stocked branch locations across the U.S., Doka delivers reliable solutions and hands-on support. The company's engineering and account management teams partner with customers from pre-planning through project close-out, ensuring safe, efficient, and profitable outcomes on every jobsite.

"We don't just deliver equipment we deliver partnership," adds Kennedy. "Our people, services, and expertise make all the difference."
